

"We operate six self-service, unattended coin laundries in Minnesota. They're open from 6:00 am until 10:00 pm 365 days per year and its 150 miles between stores. All of our washers and dryers have Imonex® coin acceptors. It's not how great the Imonex® coin acceptor is, but what it does for our laundries by accepting dollar tokens, dollar coins and quarters in the same acceptor. It's true there are fewer coin jams with Imonex® coin acceptors but it's all about accepting dollar tokens and here's why:

With dollar tokens: There are less coin jams partly because fewer coins go through the acceptor. The coin boxes don't over fill with quarters. We only need to collect the store once per week. Our customers don't need to put in 40 quarters to start a \$10.00 machine. Each of our laundries floats about \$1,000.00 per year in tokens which covers the cost of the tokens and then some. We can use tokens for promotions. All refunds are paid out with tokens not cash. There is less chance we will be broken into. We accept credit cards through our changers for tokens. This is 10% to 25% of our sales. If a customer has tokens left over they must come back to our laundries to use them. Without Imonex® coin acceptors most of this is not possible."
